

Querying Details About a Single Ticket (Lightweight)

Interface Function

This interface is used to query details about a single ticket (including only ticket details and submission records).

NOTE

If new tenants in IMOC 25.2.RC1 or later are interworked, the system uses the UTC time. Therefore, the time in the request and response messages is the UTC time. If existing tenants in versions earlier than IMOC 25.2.RC1 are interworked, the local time is used.

Request Method

POST

Flow Control

A maximum of 200 requests can be sent per second. If the number of requests exceeds 200, error code 500 is returned, and the following information is displayed: **AccessLimit**
Monitor Client *xxx* **reqUrl** *xxx* **overspeed limit** *xxx* ,**reqTotal** *xxx*.

URI

/eticket/openapi/order/query/single/oa

- Path parameters
None
- Query parameters
None

Request Message

- Message headers
For details, see [Authentication Mode](#).
- Message body

Table 1 Request parameters

Parameter	Value Type	Mandatory	Value Range	Description
orderIds	String	Yes	None	One or more ticket IDs. Use commas (,) to separate multiple ticket IDs.

- Request example

```
POST /eticket/openapi/order/query/single/oa HTTP/1.1
Host: https://<IP address>:<Port number>
Accept: application/json;charset=UTF-8
{
  "orderIds": "5e62bffbda211ea84d3286ed4898fdc"
}
```

Response Message

- Response parameters

Table 2 Parameters of the response message body

Parameter	Value Type	Value Range	Description
code	String	None	Response code. The value 200 indicates success, and the value 500 indicates failure.
data	String	None	Response object.

Parameter	Value Type	Value Range	Description
error	String	None	Exception information.

- Data parameters

Parameter	Value Type	Value Range	Description
applyUser	String	None	Applicant.
beginTime	String	None	Start time.
createBy	String	None	Creator.
createTime	String	None	Creation time.
cssModel	String	None	Ticket style.
currentStepDistribu	String	None	Current step parameter.
currentStepId	String	None	Current step ID.
currentStepName	String	None	Current step name.
currentStepNameI18n	String	None	Internationalized name of the current step.
currentStepNameI18n.en_US	String	None	Internationalized English name of the current step.
currentStepNameI18n.zh_CN	String	None	Internationalized Chinese name of the current step.
currentStepNameI18n.fr_FR	String	None	Internationalized French name of the current step.
currentStepSeq	String	None	Sequence number of the current step.
currentUser	String	None	Current handler.

Parameter	Value Type	Value Range	Description
iamTenant	String	None	Tenant account.
isClaim	String	1 : yes; 0 : no	Whether active claiming is used.
logList	JSON array	None	Ticket processing record list.
modelId	String	None	Model ID.
modelName	String	None	Model name.
modelName18n	String	None	Internationalized name of a model.
modelName18n.en_US	String	None	Internationalized English name of a model.
modelName18n.zh_CN	String	None	Internationalized Chinese name of a model.
modelName18n.fr_FR	String	None	Internationalized French name of a model.
modelType	String	None	Model type.
modifyTime	String	None	Modification time.
newCurrentUser	String	None	New current handler.
orderBy	String	None	Sorting field.
orderId	String	None	Ticket ID.
orderName	String	None	Ticket name.
orderNumber	String	None	Ticket serial number.
orderSource	String	None	Ticket source.
orderStatus	String	None	Ticket status.

Parameter	Value Type	Value Range	Description
processType	String	None	Processing type.
stepList	String	None	Ticket step list.
submitAble	String	true; false	Whether to enable the quick ticket submission function.
tenant	String	None	Tenant account.
assignmentGroupRange	String	None	Range specified by the previous node.
allCurrentUser	String	None	Full name of the current handler.
createGroupId	String	None	ID of the created group.
createGroupName	String	None	Name of the created group.
reassignment	String	None	Whether to support reassignment.
changePermission	String	None	Reassignment permission.
reassignmentMap	String	None	Reassignment scope.
processGroups	List	None	Details of the current processing group.

- logList parameters

Parameter	Value Type	Value Range	Description
actStepId	String	None	Flowchart step ID.
createTime	String	None	Creation time.
handleOpinion	String	None	Operation.
handleResult	String	None	Handling suggestion.

Parameter	Value Type	Value Range	Description
handleTime	String	None	Handling time.
handleUser	String	None	Handler.
logId	String	None	Log ID.
modifyTime	String	None	Modification time.
newHandleUser	String	None	Step handler.
orderId	String	None	Ticket ID.
stepName	String	None	Step name.
stepNameI18n	String	None	Internationalized name of a step.
stepNameI18n.en_US	String	None	Internationalized English name of a step.
stepNameI18n.zh_CN	String	None	Internationalized Chinese name of a step.
stepNameI18n.fr_FR	String	None	Internationalized French name of a step.
handleGroup	String	None	Handling group ID.
handleGroupName	String	None	Handling group name.

- processGroups parameters

Parameter	Value Type	Value Range	Description
groupId	String	None	Group ID.
groupName	String	None	Group name.
type	String	None	Personnel field type.
groupUserList	String	None	Set of group types.
userList	String	None	Set of personnel types in a group.

Parameter	Value Type	Value Range	Description
userId	String	None	Employee ID of a user.
accountFull	String	None	Full name of a user.

- Example of a correct response packet

HTTP/1.1 200
