

Querying Details About a Single Ticket

Interface Function

This interface is used to query details about a ticket based on the ticket ID or serial number.

NOTE

If new tenants in IMOC 25.2.RC1 or later are interworked, the system uses the UTC time. Therefore, the time in the request and response messages is the UTC time. If existing tenants in versions earlier than IMOC 25.2.RC1 are interworked, the local time is used.

Request Method

POST

Flow Control

A maximum of 200 requests can be sent per second. If the number of requests exceeds 200, error code 500 is returned, and the following information is displayed: **AccessLimit Monitor Client** *xxx* **reqUrl** *xxx* **overspeed limit** *xxx*, **reqTotal** *xxx*.

URI

/eticket/openapi/order/query/single

- Path parameters
None
- Query parameters
None

Request Message

- Message headers
For details, see [Authentication Mode](#).
- Message body

Table 1 Request parameters

Parameter	Value Type	Mandatory	Value Range	Description
orderId	String	No (either orderId or orderNumber must be set)	None	Ticket ID.
orderNumber	String	No (either orderId or orderNumber must be set)	None	Ticket serial number.

- Example of a correct request packet

```
POST /eticket/openapi/order/query/single HTTP/1.1
Host: https://<IP address>:<Port number>
Accept: application/json;charset=UTF-8
{
  "orderId": "5e62bffbda7211ea84d3286ed4898fdc",
  "orderNumber": "asda2008102GZg"
}
```

Response Message

- body parameters

Parameter	Value Type	Value Range	Description
code	String	None	

Parameter	Value Type	Value Range	Description
			Response code. The value 200 indicates success, and the value 500 indicates failure.
data	String	None	Response object.
msg	String	None	Error information.

- data parameters

Parameter	Value Type	Value Range	Description
applyUser	String	None	Applicant.
allCurrentUser	String	None	Ticket handling team.
approvalEnableFlag	String	0 (optional); 1 (mandatory)	Whether to set that an approval comment is mandatory. The options are 0 (optional) and 1 (mandatory).
beginTime	String	None	Start time.
cloneAble	String	true (enabled); false (disabled)	Whether to enable the clone function.
createBy	String	None	Creator.
createTime	String	None	Creation time.
cssModel	String	None	Ticket style.
currentStepDistribu	String	None	Current step parameter.
currentStepId	String	None	Current step ID.
currentStepName	String	None	Current step name.
currentStepName18n	String	None	Internationalized name of the current step.
currentStepName18n.en_US	String	None	Internationalized English name of the current step.
currentStepName18n.zh_CN	String	None	Internationalized Chinese name of the current step.
currentStepName18n.fr_FR	String	None	Internationalized French name of the current step.
currentStepSeq	String	None	Sequence number of the current step.
currentUser	String	None	Current handler.
favoritesAble	String	true (enabled); false (disabled)	Whether to enable the ticket favorites function. The options are true (yes) and false (no).
iamTenant	String	None	Tenant account.
isClaim	String	1 : yes; 0 : no	Whether the claim is active. The options are 1 (yes) and 0 (no).
isNeedTrigger	String	None	Whether to trigger a trigger. The default value is false .
logList	String	None	Ticket processing record list.
modelId	String	None	Model ID.
modelName	String	None	Model name.
modelNameEn	String	None	English name of a model.

Parameter	Value Type	Value Range	Description
modelName18n	String	None	Internationalized name of a model.
modelName18n.en_US	String	None	Internationalized English name of a model.
modelName18n.zh_CN	String	None	Internationalized Chinese name of a model.
modelName18n.fr_FR	String	None	Internationalized French name of a model.
modelType	String	None	Model type.
modifyTime	String	None	Modification time.
newApplyUser	String	None	New creator.
newCurrentUser	String	None	New current handler.
orderBy	String	None	Sorting field.
orderId	String	None	Ticket ID.
orderName	String	None	Ticket name.
orderNumber	String	None	Ticket serial number.
orderSource	String	None	Ticket source.
orderStatus	String	None	Ticket status.
page	String	None	Pagination parameter.
processType	String	None	Processing type.
processGroups	String	None	Current ticket handling team.
stepList	JSON array	None	Ticket step list.
submitAble	String	true; false	Whether to enable the quick ticket submission function.
tenant	String	None	Tenant account.

- logList parameters

Parameter	Value Type	Value Range	Description
actStepId	String	None	Flowchart step ID.
createTime	String	None	Creation time.
handleOpinion	String	None	Operation.
handleResult	String	None	Handling suggestion.
handleTime	String	None	Handling time.
handleUser	String	None	Handler.
logId	String	None	Log ID.
modifyTime	String	None	Modification time.
newHandleUser	String	None	Step handler.
orderId	String	None	Ticket ID.
stepName	String	None	Step name.
stepName18n	String	None	Internationalized name of a step.
stepName18n.en_US	String	None	Internationalized English name of a step.

Parameter	Value Type	Value Range	Description
stepName18n.zh_CN	String	None	Internationalized Chinese name of a step.
stepName18n.fr_FR	String	None	Internationalized French name of a step.
handleGroup	String	None	Handling group ID.
handleGroupName	String	None	Handling group name.

- stepList parameters

Parameter	Value Type	Value Range	Description
actId	String	None	Flowchart ID.
assist	String	None	Auxiliary item for approval.
cascadeList	String	None	Cascading rule.
createTime	String	None	Creation time.
discardedDisplay	String	true; false	Whether the data can be discarded.
distribuMode	String	None	Distribution mode.
fieldList	String	None	Field list.
groupList	String	None	Group list.
jumpList	String	None	Jump set.
linkList	String	None	Association set.
modifyTime	String	None	Modification time.
orderId	String	None	Ticket ID.
ruleList	String	None	Rule set.
saveLogDisplay	String	true; false	Whether to display saved logs.
scrappedDisplay	String	true; false	Whether to discard the data.
signType	String	single : default value multi : countersigning vote-xxx : countersigning by voting, with a vote rate of xxx%	Approval mode.
signUser	String	None	Countersigning user.
stepButton	String	Save, reject, roll back, submit, reassign, claim, release, discard, suspend, cancel suspension, and specified rollback	Approval button.
stepDesc	String	None	Step description.
stepEnName	String	None	English name of a step.
stepName18n	String	None	Internationalized name of a step.
stepName18n.en_US	String	None	Internationalized English name of a step.
stepName18n.zh_CN	String	None	Internationalized Chinese name of a step.
stepName18n.fr_FR	String	None	Internationalized French name of a step.
StepId	String	None	Step ID.

Parameter	Value Type	Value Range	Description
stepName	String	None	Step name.
stepSeq	Integer	None	Sequence number of a step.
systemNodeDisplay	String	true; false	Whether to display system logs.
filterEntities	List<Object>	None	Field verification rule set.

- fieldList parameters

Parameter	Value Type	Value Range	Description
anonymizeSize	String	None	Encryption range.
createTime	String	None	Creation time.
fieldCode	String	None	Field code.
fieldDefault	String	None	Default value.
fieldEnName	String	None	English name of a field.
fieldNamel18n	String	None	Internationalized name of a field.
fieldNamel18n.en_US	String	None	Internationalized English name of a field.
fieldNamel18n.zh_CN	String	None	Internationalized Chinese name of a field.
fieldNamel18n.fr_FR	String	None	Internationalized French name of a field.
fieldName	String	None	Field name.
fieldProp	String	None	Field attribute.
fieldSeq	Integer	None	Field sequence.
fieldType	String	None	Field type.
id	String	None	Field ID.
isAnonymize	String	None	Indicates whether the text is encrypted.
isOutside	String	yes; no	Indicates whether the reference is an external reference. This parameter is used for tables and drop-down lists and is used for dynamic loading reference of HTTP requests. The options are yes (referenced) and no (not referenced).
isPrivacy	String	true; false	Whether a field is a privacy field, which is visible to a privacy field handler.
isRebackWrite	String	None	Whether to write the data.
isRegular	String	None	Whether to perform regular expression check.
modifyTime	String	None	Modification time.
optionList	String	None	Additional attribute.
regularRule	String	None	Regular expression rule.
regularRuleNameEnTips	String	None	Regular expression prompt in English.
regularRuleNameTips	String	None	Regular expression prompt in Chinese.
relationFlag	String	None	Whether to associate the data.
secret	String	yes; no	Whether to encrypt the data.
stepId	String	None	Step ID.

- optionList parameters

Parameter	Type	Value Range	Description
createTime	String	None	Creation time.
fieldId	String	None	Field ID.
modifyTime	String	None	Modification time.
optionFlag	String	None	The options are 1 (unselected) and 2 (selected). The default value is 2 .
optionId	String	None	Additional attribute ID.
optionKey	String	None	Option name.
optionSeq	String	None	Option sequence.
optionValue	String	None	Option value.

- groupList parameters

Parameter	Value Type	Value Range	Description
createTime	String	None	Creation time.
groupId	String	None	User group ID.
groupName	String	None	User group name.
modifyTime	String	None	Modification time.
page	String	None	Pagination parameter.
stepId	String	None	Step ID.

- conditions parameters

Parameter	Value Type	Value Range	Description
condFieldCompare	String	None	Condition-based judgment.
createTime	String	None	Creation time.
linkCondId	String	None	Association condition ID.
linkFieldCode	String	None	Associated field code.
linkFieldName	String	None	Associated field name.
linkFieldValue	String	None	Associated field value.
linkId	String	None	ID of the associated work item.
linkValue	String	None	Associated value.
modifyTime	String	None	Modification time.

- linkList parameters

Parameter	Value Type	Value Range	Description
conditions	String	None	Association condition set.
createTime	String	None	Creation time.
linkFieldCode	String	None	Associated field code.
linkFieldName	String	None	Associated field name.
linkId	String	None	ID of the associated work item.

Parameter	Value Type	Value Range	Description
linkModelId	String	None	Associated model ID.
linkStepId	String	None	Association step ID.
modifyTime	String	None	Modification time.

- processGroups parameters

Parameter	Value Type	Value Range	Description
groupId	String	None	Group ID.
groupName	String	None	Group name.
type	String	None	Personnel field type.
groupUserList	String	None	Set of group types.
userList	String	None	Set of personnel types in a group.
userId	String	None	Employee ID of a user.
accountFull	String	None	Full name of a user.

- filterEntities parameters

Parameter	Value Type	Value Range	Description
filterId	String	None	Rule ID
firstFieldCode	String	None	Code of field 1 in the verification rule
secondFieldCode	String	None	Code of field 2 in the verification rule
filterType	Integer	1; 2	Verification type: 1: applicable to the personnel field, where the value of field 1 is the query result for which the value of field 2 used as the query condition 2: applicable to date fields, where the time specified by field 1 must be later than that specified by field 2 plus extrasHours
extrasHours	Integer	None	xx hours field 1 must be later than field 2 (applicable only to date fields in the default format)
