

Querying Model Details

Interface Function

This interface is used to query the details of the current model according to the model ID.

Request Method

POST

Flow Control

A maximum of 200 requests can be sent per second. If the number of requests exceeds 200, error code 500 is returned, and the following information is displayed: **AccessLimit Monitor Client** *xxx* **reqUrl** *xxx* **overspeed limit** *xxx*,**reqTotal** *xxx*.

URI

/eticket/openapi/model/queryByModelId

- Path parameters
None
- Query parameters
None

Request Message

- Message headers
For details, see [Authentication Mode](#).
- Message body

Table 1 Request parameters

Parameter	Value Type	Mandatory	Value Range	Description
modelId	String	Yes	None	Ticket model ID.

- Example of a correct request packet

```
POST /eticket/openapi/model/queryByModelId HTTP/1.1
Host: https://<IP address>:<Port number>
Accept: application/json;charset=UTF-8
{
  "modelId": "08860085208b11e99c68286ed4898fdc"
}
```

Response Message

- Response parameters

Table 2 Parameters of the response message body

Parameter	Value Type	Value Range	Description
data	String	None	Response object.
code	String	None	Response code. The value 200 indicates success, and the value 500 indicates failure.
status	Integer	None	Error code, such as 500 and 401 .

Parameter	Value Type	Value Range	Description
msg	String	None	Error information.

Table 3 Parameters of the response message data

Parameter	Value Type	Value Range	Description
modelId	String	None	Model ID.
modelName	String	None	Model name.
modelName18n	String	None	Internationalized name of a model.
modelName18n.en_US	String	None	Internationalized English name of a model.
modelName18n.zh_CN	String	None	Internationalized Chinese name of a model.
modelName18n.fr_FR	String	None	Internationalized French name of a model.
processManager	String	None	Process manager.
cssModel	String	model1: classic; model2: simple; model3: retro; model4: minimalist	Built-in model style.
isDeleted	String	yes: deleted no: not deleted	Whether a model is deleted.
groupList	String	None	Group list.
modelType	String	None	Model type.
stepList	JSON array	None	Ticket step list.
modelDesc	String	None	Model description.
modelDesc18n	String	None	Model description internationalization.
createBy	String	None	Creator.
iamTenant	String	None	Tenant name.
createTime	Long	None	Creation time.
uniqNumber	String	None	Ticket numbering rule.
enableFlag	String	true: enabled false: disabled	Whether a model is enabled.
actModelId	String	None	Flowchart associated model ID.
approvalEnableFlag	Integer	0: optional 1: mandatory	Whether to set that an approval comment is mandatory.

Parameter	Value Type	Value Range	Description
imgUrl	String	None	Model icon path.
isSensitive	String	yes: sensitive no: not sensitive	Whether data is sensitive.

Table 4 stepList parameters

Parameter	Value Type	Value Range	Description
stepId	String	None	Step ID.
stepName	String	None	Step name.
stepNameI18n	String	None	Internationalized name of a step.
stepNameI18n.en_US	String	None	Internationalized English name of a step.
stepNameI18n.zh_CN	String	None	Internationalized Chinese name of a step.
stepNameI18n.fr_FR	String	None	Internationalized French name of a step.
stepDesc	String	None	Step description.
distribuMode	String	auto: automatic distribution claim: active claiming assigned: assigned by the upper-level node claim_assigned: active claiming and assigned by the upper-level node	Distribution mode.
scrappedDisplay	String	true; false	Whether the data can be discarded (true: yes; false: no).
ruleList	JSON array	None	Rule list.
jumpList	JSON array	None	Redirect list.
groupList	JSON array	None	User group list.
linkList	JSON array	None	Association set.
fieldList	JSON array	None	Field set.
signUser	String	None	Countersigning user.
actId	String	None	Flowchart node ID.
stepSeq	Integer	None	Node sequence number.
createBy	String	None	Creator.
createTime	Long	None	Creation time stamp.

Parameter	Value Type	Value Range	Description
signType	String	single: default value multi: countersigning vote-xxx: countersigning by voting, with a vote rate of <i>xxx</i> %	Approval mode.
filterEntities	List<Object>	None	Field verification rule set.

- fieldList parameters

Parameter	Value Type	Value Range	Description
fieldCode	String	None	Field code.
fieldDefault	String	None	Default value.
fieldEnName	String	None	English name of a field.
fieldName18n	String	None	Internationalized name of a field.
fieldName18n.en_US	String	None	Internationalized English name of a field.
fieldName18n.zh_CN	String	None	Internationalized Chinese name of a field.
fieldName18n.fr_FR	String	None	Internationalized French name of a field.
fieldName	String	None	Field name.
fieldProp	String	None	Field attribute.
fieldSeq	Integer	None	Field sequence.
fieldType	String	None	Field type.
id	String	None	Field ID.
isRegular	String	None	Whether to perform regular expression verification.
optionList	String	None	Additional attribute.

- optionList parameters

Parameter	Value Type	Value Range	Description
optionFlag	String	None	The default value is 2 : 1 : unselected 2 : selected
optionId	String	None	Additional attribute ID.
optionKey	String	None	Option name.
optionSeq	String	None	Option sequence.
optionValue	String	None	Option value.

- filterEntities parameters

Parameter	Value Type	Value Range	Description
filterId	String	None	Rule ID
firstFieldCode	String	None	Code of field 1 in the verification rule
secondFieldCode	String	None	Code of field 2 in the verification rule
filterType	Integer	1; 2	Verification type: 1: applicable to the personnel field, where the value of field 1 is the query result for which the value of field 2 used as the query condition 2: applicable to date fields, where the time specified by field 1 must be later than that specified by field 2 plus extrasHours
extrasHours	Integer	None	xx hours field 1 must be later than field 2 (applicable only to date fields in the default format)

- Example of a correct response packet
